Microwave Power Modules

OVERVIEW

Stellant Systems is the industry leader in Microwave Power Modules (MPMs), having delivered thousands for use in some of the aerospace and defense industry's most highly-effective platforms. Our MPMs typically include a miniature Helix Traveling-Wave Tube (TWT), a Solid-State Amplifier (SSA) driver and a miniature power supply.

Our MPMs are qualified for space, ground, sea and/or airborne applications and are typically used in Unmanned Aerial Vehicles (UAVs), Radar and ECM systems, portable and mobile SATCOM systems, and point-to-point communications. Advancements in MPMs have led to the development of our new NanoMPM®, a compact model qualified for space, airborne, sea or ground applications where size and weight are prime requirements.

Additionally, our IRAD investments are in partnership with government laboratories and federally funded research Institutions in order to advance the state of the art in TWT and MPM technologies.

FEATURES

- * From 2 to 235GHz, output power 40 to 300+ watts
- * 270 VDC, 28 VDC or 115 VAC 3-phase prime power
- * Low Size and Weight, High-Reliability
- * Suitable for CW and/or pulsed requirements
- * Fully Compatible with Software Defined Radios

OPTIONS

- * Can be optimized for narrow-band applications
- * Customized for specific power vs. frequency requirements
- * Integral equalizer and/or linearizer available
- * Pulse modulator included on all models
- * Optional forced-air heat exchanger

Millimeter-Wave
18 – 40 GHz, 100 W

6.5 – 18 GHz, 200W

High Band
6.0 – 18 GHz, 125 W

E-Band Secure Uplink
81 to 86 GHz, 100 W

Space-Qualified

Contains 4 TWTs

nanoMPM®
K- and Ku-Band
17.3 to 21.2 GHz, 4 x 60 W
10.75 to 12.75 GHz, 4 x 80 W

Low Band
2 – 6 GHz, 80 W

Stellant's linear flow MPM manufacturing area meets AS9100 and ISO 9001:2016 demands while reducing production cycle time.

This increases total capacity through optimized equipment utilization operations and process enhancements to maximize production throughput.

Together, We Can Go Farther!

Stellant Systems is a partner for civil, military, and commercial organizations whose missions seek to ensure a safe, aware, and connected world.

We are a premier manufacturer of critical spectrum and power amplification products for defense, space, medical/scientific and industrial customers worldwide.

History of Innovation

Our business started as Charles Litton's Engineering Laboratories in 1932 (Redwood City, CA) and Howard Hughes' Electron Tube Laboratory in 1959 (Culver City, CA).

Along the way, there have been multiple acquisitions and consolidation of divisions that operated under larger organizations such as Sylvania, Loral, GM Hughes, Sperry, GE, RCA, Boeing, L3Harris and Comtech —to name a few.

This heritage is preserved and continues today as Stellant Systems.

Our Business

- * Approximately 1100 employees
- * 5 manufacturing facilities — ISO 9001:2015, AS9100:2016, DCMA certified
- * ONLY Vertically Integrated Space TWTA supplier in the world
- * ONLY manufacturer of space-qualified TWTs in the USA
